

**DENTISTREE
DENTAL CLINIC**

Date: 21/02/2023

Patient: Neekita Goyal

D.O.B : 06/03/2010

File Number:

Ms. Neekita Goyal has an Angle's Class II Malocclusion with increased overjet and crowding in both arches. The treatment plan is fixed orthodontic treatment after the extraction of upper first premolars. The estimated treatment time will be 16-18 months. Retainers will be given at the end of active treatment.

For further information please do not hesitate to contact me.

Sincerely,

Dr. Pratik Premjani

Specialist Orthodontist
