

13/7/2023

Patient Nustam Jaysingh had visited clinic on 16<sup>th</sup> June 2023 complaining of dislodged restoration of # 31 (Retreated). Informed patient xray has to be taken before placing restoration as the cavity is deep. Patient donot wish to take xray. In patients demand against my dental advice temporary restoration placed which ideally should go for Re-RCT and composite restoration based on diagnosis by examining xray. Doing restoration against my dental advice.
