

**NITROUS OXIDE
INFORMED CONSENT FORM**

Patient Name: Pransh Nikay Kumar DOB: 30/12/2018

The purpose of this Informed consent is to provide an opportunity for patients (and/or their parents or guardians) to understand and give permission for the use of Nitrous Oxide when provided along with dental treatment. Each item should be initiated after the patient (and/or parent or guardian) has had the opportunity for discussion or questions.

1. I accept and understand that Nitrous Oxide is commonly called "laughing gas" and provides relaxation, although your child will be awake, fully conscious aware of their surroundings, and they are able to respond rationally to questions and directions.
2. I accept and understand that the use of Nitrous Oxide is not required to provide the necessary dental care.
3. I accept and understand that the purpose of Nitrous Oxide is to make it more comfortable for my child to receive the necessary dental care with less pain and/or anxiety. I also accept and understand that the use of Nitrous Oxide has limitations and risks, and absolute success cannot be guaranteed. (See also #6, below.).
4. I accept and understand that Nitrous Oxide will be administered by way of the inhalation route.
5. I accept and understand that the alternatives to Nitrous Oxide are:
 - a. No Nitrous Oxide: The necessary procedure is performed under local anaesthesia only.
 - b. General Anaesthesia: Commonly GA, a child under general anaesthesia has no awareness and must have his/her breathing temporarily supported. General anaesthesia is appropriate for more invasive procedures.
6. The use of Nitrous Oxide has been fully explained to me, including all risks involved. I have been fully informed that temporary complications may include, but are not exclusive of: tingling in the fingers, toes, cheeks, lips, tongue, head or neck area; heaviness in the thighs/or legs, followed by a lighter floating feeling; resonance in the voice or presence of a hyper nasal tone; warm feeling throughout body, with flushed cheeks; episodes of uncontrollable laughter or giddiness; detachment or dissociation from environment may occur; intense and uncomfortable ward and/or hot feeling throughout body; lightweight or floating sensation with an accompanying "out of body" sensation; sluggishness in motion and slurring and/or repetition of words; feeling of nausea; vomiting; agitation; and hallucination. All these complications are temporary.
7. I have had the opportunity to discuss Nitrous Oxide in conjunction with my child's dental care, and have had the opportunity to ask questions, and am fully satisfied with the answers I received.
8. I accept and understand that I must follow all recommended instructions.
9. I have informed the doctor of my child's complete medical history including any recent surgeries or changes in my child's medical history involving lung, respiratory, ear infection or common cold. I also accept and understand that I must notify the doctor of my child's mental and physical condition.

PARENT/GUARDIAN SIGNATURE Rishi Kumar DATE 18/05/2019
