MEDICAL REPORT

Our patient Nayaab Ali Merchant Iqbal Hassan Raza Husein Merchant (4223), reviewed our clinic for assessment of .

Examination : request for I.O.P.A rejected for #11.

Impression : o/e- tooth no# #11 gives history of trauma as he has an accident few days back, distal half of the canine is cracked with loss of tooth structure, no pain on percussion seen due to medication. no movement with the tooth, soft dentine and food accumulated near the cervical area, more chances of pulp involvement.

Recommendation : the O.P.G does not show the preapical area clearly, as well as the tooth involvement and the dentine near the pulp will be more clear for diagnosis of the concerned tooth in an I.O.P.A , as well as will let me decide if i can do a direct pulp capping of wee need to do a root canal will only be decided after an I.O.P.A.

This report has been dictated at the request of the patient. I hope that it satisfied your records. Please do not hesitate to contact us if we can be of any further assistance in any particular way.
