Patient by name Soniya. Liane
Age: 43 yrs came to the clinic with
chief complaint of debonded temporary
pontic tooth in the region of tooth #4.
She had got her treatment done
at another clinic in Dubai. The patient
is not willing for an x-ray or any
other treatment to be done. She insisted
on getting the temporary pontic tooth to
be rebonded. The patient has been
explained it will not bond well and
will not last longer and can come out
any time. The patient has given her consent
after which the treatment was done.
