

DENTISTREE DENTAL CLINIC

Patient Name: Lya Dick Nzula Gender: Male

Restoration Type: Crown Tooth Number: 16

Dental Zirconia is utilized for endodontic posts and implants. (Endodontic post helps you retain your restorations and fillings as well as crowns.) **Zirconia crowns** are the strongest dental crowns. Dental Zirconia is known for its durability, making it an ideal product to use in dental crowns, especially posterior crowns that require a lot of strength for chewing and grinding food.

Advantages of Having Zirconium Crown

Zirconium is growing one of the most preferred materials for dental crowns. Its many advantages include:

- Superior looks
- More confident smile
- Biocompatible
- Extraordinarily tough
- They bond well with your tooth
- Metal-free
- Strong, durable material
- Long lasting and reliable restoration
- Safe for patients with metal-allergies
- The appearance of the crowns is completely natural, they match the patient's natural teeth perfectly

Disadvantages of Having Zirconium Crown

The disadvantages of zirconia crowns are minimal.

- Zirconia crowns can be very pricey
- The appearance of zirconium **may not** exactly match the tone of a patient's natural tooth
- Robust and hard nature

The nature and type of material used in my crowns, bridges and/or veneers has been explained to me. By signing below I acknowledge and authorize the material discussed to be used in my mouth. I have been given the opportunity to view my crowns, bridges and/or veneers as processed, either on models or placed in my mouth prior to final cementation. **I approve the color, shape, feel and overall appearance of the final restoration. I understand that once the restoration is cemented in my mouth, the factors of color, shape, feel and overall appearance cannot be changed without additional and possibly significant time being taken and fees assessed.** I further understand that removing cemented restoration may create the risk of injury or breakage to the underlying teeth and will destroy the restoration, requiring a remake. I further understand that if I authorize cementation and later decide I do not like the restorations, any replacement(s) of the cemented restorations will be at full cost. By signing this Consent for Final Cementation I give **DENTISTEE DENTAL CLINIC** my consent for final cementation, acknowledge my approval of the appearance and authorize use of the discussed material.

I Understand the oral and written of Post op instruction which discuss to me and understand Regular dental examinations are important to maintain the function and appearance of one's crowns, bridges, etc.
