Type of risk:

- I understand that, preparing a tooth for a veneer may consist of removing the enamel from the surface of the teeth
- I understand that, preparing a tooth may irritate the nerve tissue (called the pulp) in the center of the tooth, leaving my teeth feeling sensitive to heat, cold or pressure.
- I understand that, preparing a tooth may cause sensitivity of teeth, which may require additional treatment including endodontic (root canal) treatment and/or crowning of the involved teeth.
- I understand that the veneers may crack, fracture or de bond /dislodge from the teeth.
