MEDICAL REPORT

Our patient Nobuhle Mngomezulu(960), reviewed our clinic for assessment of .

- Examination** : patient came to clinic with fractured central incisors 11 and 21 swollen lips,tender on palpation near gingival area and exposed pulp on 11 in 21 no pulp exposure
- patient consent taken emergency access opening done, advised patient to wait and monitor the teeth with respect to 11 and 21,before doing final restoration,chances of swelling,pain,cyst formation or complications
- Impression** : explained to patient . patient hurrying up treatment as she had to travel back to home country. as per her request explaining the risks involved,obturation and final restoration placed on 11 and composite buildup done on 21
- Recommendation** : advised patient to do rest of the treatments and monitor the two teeth asap back in home country as treatment was done as emergency treatment done in dubai per patients request zirconia or emax crown to be done on 11 root canal treatment to be done on 21 followed by crown. As patient went against my will and wanted to do treatments asap,i no longer hold responsible for the outcome and complications.

This report has been dictated at the request of the patient. I hope that it satisfied your records. Please do not hesitate to contact us if we can be of any further assistance in any particular way.
